

Renewable Energy Certificate Information

This offer meets CT's [YEAR] minimum of [XX%] mandatory renewable energy certificate requirements.

All suppliers must purchase a minimum amount of renewable energy certificates* (RECs) from generating sources based on the amount of electricity the supplier sells in Connecticut to meet the state's Renewable Portfolio Standards (RPS).

The RECs must be from these sources:
Class I [XX%] – solar, hydroelectric, wind and Fuel Cell
Class II [XX%] - trash-to-energy sources
Class III [XX%] - Combined Heat and Power facilities, energy efficiency projects.

Learn more about CT's RPS requirements at [CT RPS Overview](#).

Voluntary Renewable Offer

This offer provides an additional [XX%] of renewable energy certificates on top of the state-required minimum.

Suppliers can purchase renewable energy certificates supported by [XX%] of usage not already supporting the minimum required certificates (the gray portion of the chart above) through Voluntary Renewable Offer (VRO) products. Selection of this VRO product means that your usage supports the purchase of [XX%] of renewable energy certificates in addition to the state-required minimum RECs described above.

These RECs come from [TYPE (wind, etc.) and STATE(s)/RTOs (if PJM control area, must indicate that this includes portions of Delaware, District of Columbia, Ohio, Illinois, Indiana, Michigan, Maryland, North Carolina, New Jersey, Pennsylvania, West Virginia or Virginia)].

** All renewable energy certificates represent the attributes of renewable generation sources as defined in Connecticut statute. To learn more about RECs visit [EnergizeCT](#). **The supplier's purchase of these renewable energy certificates DOES NOT mean that the specific electricity that you are buying through this offer comes from the renewable sources indicated on this Label.** Please refer to the next page (generation source information) to see the makeup of the electricity delivered.*

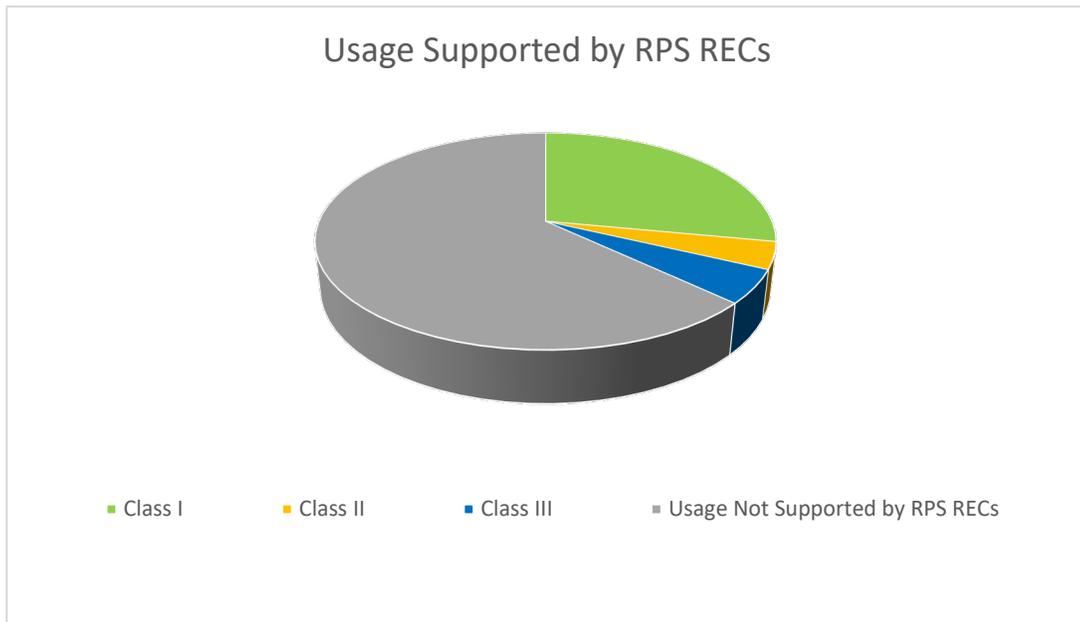

For information about the RECs that support this offer visit [supplier's specific website page for this information]. You can also contact CT's Public Utilities Regulatory Authority at 800-382-4586 or pura.information@ct.gov

Generation Source Information

Resources Used To Generate Your Electricity & Related Emissions

The electricity for this offer comes from the following generation sources:
[NEW ENGLAND REGIONAL GENERATION MIX]

*Renewables include: Wind, Refuse, Wood, Solar, Landfill Gas, Methane, and Steam

EMISSIONS [2021]

Natural gas	436.5 lb/MWh
Nuclear	0 lb/MWh
Renewables	247.0 lb/MWh
Hydroelectric	0 lb/MWh
Other	66.4 lb/MWh
